

# SENSORS FOR THE PRINTING INDUSTRY

As a specialist in sensors for the graphic industry, Pepperl+Fuchs offers a wide variety of sensing technologies.

We introduced the world's first inductive proximity sensor in 1958, and over the years we've extended our product portfolio to include ultrasonic, photoelectric, and capacitive sensors, rotary encoders, vision sensors, interface modules, and a complete line of cordsets and accessories. We continue to increase our range of established base technologies with ongoing innovations. The acquisition of the Visolux (2000, photoelectric sensors) and Omnitron (2004, data matrix readers) brands has enabled us to further expand and define our position in the print and paper industry.

With this wide product offering—available from a single source—our experts can help you choose the appropriate sensing technologies for your specific application, no matter where you're located. With locations on six continents, a global presence enables Pepperl+Fuchs to offer the best of both worlds: extremely high engineering standards combined with efficient, low-cost manufacturing facilities. We have exactly what you need to make your process efficient and reliable.

## PEPPERL+FUCHS – COMPETENCE AT A GLANCE

- A proven record of delivering reliable sensors to the graphic industry for over 30 years. Many of those early sensors are still functioning reliably.
- We continue to provide these sensors as continuity products that will be available as long as you need them.
- Our stability and proven record ensure a long-term partnership.
- Specified by key manufacturers and OEMs.

The following pages include a short overview of typical applications for our sensors in various printshop machines. Let us show you how we can improve your printing process. Our specialists will be glad to help you.

# TABLE OF CONTENTS

## SHEET FED PRINTING

14

# SHEET FED PRINTING

## STACKER SAFETY

### SLCS • SLCT • SLP • SAFEBOX

- Safety light curtains detect entry into hazardous areas
- Safety categories 2 and 4
- Narrow beams provide immunity to interference from reflective surfaces
- SafeBox modular safety controller connects all safety components into one unit

## DATA AND ENERGY TRANSFER

### WIS

- Wireless transfer of power and sensor signals from moving or rotating parts
- No mechanical or electrical contact required
- Allows sensor installation on moving equipment (drums, modules, turntables)
- Connects up to four sensors

## PALLET DETECTION

### VDM28 • UB500-18GM • UB500-12GM

- Reliable and precise detection of position regardless of pallet color or finish
- Analog and discrete outputs

## MOTION DETECTION

### MS32

- Measures direction and speed
- Precise detection of motion in x and/or y axes
- Non-contact detection of irregular surfaces without requiring an edge or reference mark
- Alarm output for overspeed conditions

## SHEET PRESENCE

### MLV41 • LT66 • ML4.2 • E18/EV18-LAS

- Detects media directly while ignoring reflective surfaces close to the target
- Enhanced edge detection using background suppression sensors
- Fast response time

## INK LEVEL DETECTION

### UCX-F43

- Reliable ink level measurement
- Low-level alarm
- Chemically-resistant housings

## DOUBLE SHEET DETECTION

### UDC-18GM-xxx

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide range of media, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

## STACK HEIGHT MONITORING

### MLV41 • MLV12 • ML4.2 • M18-LAS-P

- Reliable detection due to small black-to-white difference
- Small, sharp light beam
- 4-in-1 output
- Antistatic lens repels paper dust

## CYLINDER AND PART POSITION

### INDUCTIVE • PMI • ENCODERS

- Precise detection of metal gear teeth, notches, and cams
- Reduction factor 1 senses all metals at the same distance
- Wide variety of housings and sensing ranges

## SHEET ALIGNMENT (FRONT LAY, SIDE LAY)

### KT10 • ML4.2

- Fast and accurate detection of a wide variety of media
- Small black-to-white difference with superior background suppression
- Wide variety of sensor styles for use in tight spaces
- Protected against paper, dust, and vibration
- 4-in-1 output minimizes inventory

## LOW ROLL DETECTION

### VDM28 • RL28 • UB500-30GM

- Monitors web stock diameter
- Sends signal for automatic or manual splicing
- Insensitive to dust and harsh environments
- Immune to roll color
- Analog and discrete outputs

## WEB TENSIONING

### VDM28 • UB300-F54

- Ensures consistent web tension
- Consistent end of roll/splice detection
- Unaffected by paper dust
- Versatile mounting
- Solutions include photoelectric or ultrasonic technologies

## SPLICE DETECTION

### UGB-18GM

- Reduces waste by identifying web splices
- Accurately detects manufacturer's, automatic, and manual splices
- Capable of double layer and label detection
- Operates with printed, colored, and glossy surfaces
- Simple, quick alignment and setup

## WEB BREAK MONITORING

### LT66, LT63, UB120-12GM

- Reliable and compact photoelectric sensors
- Easy setup and diagnostics
- Tamperproof or adjustable versions available
- Reduces scrap

## PRINT MARK TRIGGER

### DKxx, DFxx

- Compact, rugged housings
- Adjustable connector positions
- High-visibility, dual-indicator LEDs
- Static and dynamic teach-in
- 4-in-1 output minimizes inventory

#### INK LEVEL DETECTION

##### UC300-F43 • UB300-18GM

- Reliable ink level measurement
- Low-level alarm
- Chemically-resistant housings

#### DATA AND ENERGY TRANSFER

##### WIS

- Wireless transfer of power and sensor signals from moving or rotating parts
- No mechanical or electrical contact required
- Allows sensor installation on moving equipment (drums, modules, turntables)
- Connects up to four sensors

#### OPERATOR SAFETY PROTECTION

##### AS-INTERFACE SAFETY AT WORK

- Monitors status of the safety inputs with one relay
- Network all e-stops, door interlocks, light curtains, etc. on one cable
- Significantly simplifies cabling

#### CYLINDER AND PART POSITION

##### INDUCTIVE • PMI • ENCODERS

- Precise detection of metal gear teeth, notches, and cams
- Reduction factor 1 senses all metals at the same distance
- Wide variety of housings and sensing ranges

#### BOOKLET COUNTING AND SHINGLE DETECTION

##### RST

- Integrated pulse divider switches after n counts
- Detect shingle heights down to 0.1 mm
- Accurate detection of glossy and shiny surfaces

## DOUBLE SHEET/SPLICE DETECTION

### UDC • UDB • UGB-18-GM

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide media spectrum, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

## TONER LEVEL

### CBNX-F64 • CBNX-F46

- Reliably detects granular or powdered ink substances
- Detect contents through toner cartridge/waste bottles
- Tried and tested technology

## PRINT MARK DETECTION

### DK12 • DF12

- Compact, rugged, die-cast housing
- Adjustable connector position
- High-visibility, dual-indicator LEDs
- Static and dynamic teach-in
- 4-in-1 output minimizes inventory

## CONSUMABLES IDENTIFICATION

### RFID

- RFID enables automatic identification of consumables
- Tracking and tracing
- Reliable identification in harsh environments

## SHEET PRESENCE/EDGE DETECTION

### GL2 • GL3 • GL5 • SU18 • SU19 • ML7

- Consistent frontal & lateral alignment
- Enhanced precision with background suppression sensors
- 4-in-1 output eliminates additional inventory
- Wide range of housing sizes available

## LOW-COST POSITION FEEDBACK

### GL2 • GL3 • GL5

- Compact, cost-effective, accurate
- Designed to fit in tight spaces
- Extremely fast response time
- Easy mounting
- Wide variety of housing styles

# FOLDING

## SHEET PRESENCE

### ML4.2 • MLV41

- Reliable media detection due to low black-to-white difference and good background suppression
- Various housing shapes available
- Antistatic glass window prevents false switching due to dust

## SHEET VERIFICATION

### VOS410-BIS

- Industrial vision verifies the printed image itself without using barcodes
- All-in-one, high-speed vision sensor
- Powerful, integrated illumination
- Automatic teach-in option
- Tamperproof, rugged design

## STACK HEIGHT MONITORING

### MLV41 • ML4.2 • FTK40 • CBN12

- Reliable detection due to small black-to-white difference
- Small, sharp light beam
- 4-in-1 output
- Antistatic lens repels paper dust

## SHEET EDGE TRIGGER

### ML4.2

- Consistent frontal & lateral alignment
- Enhanced precision with background suppression sensors
- Protected against paper dust and vibration
- 4-in-1 output eliminates additional inventory

## DOUBLE SHEET DETECTION

### UDC-18GM

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide media spectrum, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

# COLLATING • STITCHING • BINDING

## DOUBLE SHEET DETECTION

### UDC-18GM

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide media spectrum, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

## SHEET PRESENCE

### ML9 • ML4.2 • ML6

- Fast and accurate detection of a wide variety of media
- Small black-to-white difference with superior background suppression
- Wide variety of sensor styles for use in tight spaces
- Protected against paper dust and vibration
- 4-in-1 output minimizes inventory

## SHEET VERIFICATION

### VOS410-BIS

- Industrial vision verifies the printed image itself without using barcodes
- All-in-one, high-speed vision sensor
- Powerful, integrated illumination
- Automatic teach-in option
- Tamperproof, rugged design

## CODE READING

### MAC400, BARCODE

#### High-Speed Barcode Imaging

- Reads 1-D and 2-D codes
- Reads and prints codes in various magnifications
- Reads codes when distorted or partially lost
- High accuracy, high resolution

#### Laser Barcode Scanners

- Reads all popular 1-D codes
- Raster scanner option
- Advanced code reconstruction algorithm
- Quick-and-easy programming and setup

## BOOKLET THICKNESS

### VDM18

- Precise detection of stack or booklet height
- High-resolution laser triangulation ensures all pages have been assembled
- Accurate height detection regardless of media color

## BOOK POSITION

### GLxx • ML4.2 • E18-LAS

- Checks booklet edge to ensure all pages are properly bound
- Narrow laser beam detects hanging sheets due to improper binding

## CYLINDER AND PART POSITION

### INDUCTIVE • ENCODERS

- Precise detection of metal gear teeth, notches, and cams
- Reduction factor 1 senses all metals at the same distance
- Wide variety of housings and sensing ranges

## WIRE/STAPLE DETECTION

### INDUCTIVE

- Wire detection and breakage monitoring
- Detects presence of staple in the assembled booklet

## DOUBLE SHEET DETECTION

### UDC-18GM

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide media spectrum, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

## SHEET PRESENCE

### ML9 • ML4.2

- Consistent frontal & lateral alignment
- Enhanced precision with background suppression sensors
- 4-in-1 output eliminates additional inventory
- Wide range of housing sizes available

## PRINT MARK TRIGGER

### DKxx • DFxx

- Compact, rugged, die-cast housing
- Adjustable connector position
- High-visibility, dual-indicator LEDs
- Static and dynamic teach-in
- 4-in-1 output minimizes inventory

## SHEET VERIFICATION

### VOS410-BIS

- Industrial vision verifies the printed image itself without using barcodes
- All-in-one, high-speed vision sensor
- Powerful, integrated illumination
- Automatic teach-in option
- Tamperproof, rugged design

## CODE READING

### MAC400, BARCODE

#### High-Speed Barcode Imaging

- Reads 1-D and 2-D codes
- Reads and prints codes in various magnifications
- Reads codes when distorted or partially lost
- High accuracy, high resolution

#### Laser Barcode Scanners

- Reads all popular 1-D codes
- Raster scanner option
- Advanced code reconstruction algorithm
- Quick-and-easy programming and setup

# PAPER CUTTING • DIE CUTTING

## STACKER SAFETY

### SLCS • SLCT • SLP • SAFEBOX

- Safety light curtains detect entry into hazardous areas
- Safety categories 2 and 4
- Narrow beams provide immunity to interference from reflective surfaces
- SafeBox modular safety controller connects all safety components into one unit

## DOUBLE SHEET DETECTION

### UDC-18GM

- Identifies zero, one, or multiple (overlapping) sheets
- Fast response time
- Extremely wide media spectrum, including fine papers, transparencies, cardstock, glossy surfaces, and metal foils

## SHEET ALIGNMENT (FRONT LAY, SIDE LAY)

### KT10 • ML4.2

- Fast and accurate detection of a wide variety of media
- Small black-to-white difference with superior background suppression
- Wide variety of sensor styles for use in tight spaces
- Protected against paper dust and vibration
- 4-in-1 output minimizes inventory

## PALLET DETECTION

### VDM28 • UB500-18GM • UB500-12GM

- Reliable and precise detection of position regardless of pallet color or finish
- Analog and discrete outputs

## CYLINDER AND PART POSITION

### INDUCTIVE • PMI • ENCODERS

- Precise detection of metal gear teeth, notches, and cams
- Reduction factor 1 senses all metals at the same distance
- Wide variety of housings and sensing ranges

## STACK HEIGHT MONITORING

### MLV41 • MLV12 • ML4.2 • M18-LAS-P

- Reliable detection due to small black-to-white difference
- Small, sharp light beam
- 4-in-1 output
- Antistatic lens repels paper dust

# STACK TURNERS

## OPERATOR SAFETY PROTECTION

### SLCS • SLCT • SLP • SAFEBOX AS-INTERFACE SAFETY AT WORK

- Monitors status of the safety inputs with one relay
- Network all e-stops, door interlocks, light curtains, etc. on one cable
- Significantly simplifies cabling

## PALLET POSITIONING

### VDM28 • UB500-18GM • UB500-12GM

- Reliable and precise detection of position regardless of pallet color or finish
- Analog and discrete outputs

## ROTATION CONTROL

### PMI360 • ENCODERS

- Precise product positioning
- Compact encoder for tight spaces
- Ultrafast response time

## STACK LIGHT/ E-STOP

### AS-INTERFACE SAFETY AT WORK

#### Stack Light

- Compatible with AS-Interface
- Various color configurations and mounting options
- Audible alarms

#### E-stop

- Illuminated and nonilluminated versions
- Integrated AS-Interface Safety at Work technology
- Twist and pull release

## INCLINATION MEASUREMENT

### INX360D-F99

- Noncontact sensing of the inclination angle in one or two axes
- Angular resolution 0.1°
- Both analog and switching outputs
- Two adjustable switching points
