

AS-Interface Gateways

- Gateways to all important industrial buses
- Used to connect data from one network to another
- Transparent to upper level network

K20

K30

AS-Interface Gateways

- Single Network 62 nodes
- Dual Network 124 nodes
- LCD text display
- Integrated memory card
- Color-coded removable terminals
- Duplicate address detection
- Ground fault indication
- Noise detector
- Overvoltage indication

AS-Interface Gateways

Technology Reports Available:

Gateways - compatible with all standard buses, option of built-in safety, performs as a slave to higher-level bus systems, and can be used as a controller in stand-alone mode.

AS-Interface Safety Monitors

- **Ideal for applications where you would like to introduce safety into an existing system**
- **Valuable with third party AS-Interface gateway (that does not support safety) on existing AS-Interface network**
- **Can stand alone and replace safe Micro PLCs**
