

Nonferrous Sensing

PILE DRIVER

- Detects aluminum at full sensing range and copper at 10% beyond standard range
- Durability identical to ferrous-only Pile Drivers—will outlast plastic-face designs by over 20X!
- 100% stainless steel construction (machined from single-piece stock)
- 0.7 mm sensing face thickness
- Both 2- and 3-wire DC outputs

Nonferrous Sensing

Sensing Ranges (to aluminum)

12 mm diameter models

NMB2-12... 2 mm

18 mm diameter models

NMB5-18... 5 mm

30 mm diameter models

NMB8-30... 8 mm

Nonferrous Sensing

- **Aluminum and brass machining**
- **Part presence for automated assembly of modern aluminum car components**
- **Metal extruding**
