

Pepperl+Fuchs Control

- **Complete IoT infrastructure from a single source**
- **Seamless integration into customer's application**
- **IO-Link masters with OPC-UA for cloud computing**
- **MultiLink™ provides data access to multiple controllers**
- **More than 30 years of experience in industrial Ethernet**

Pepperl+Fuchs Comtrol

- Pepperl+Fuchs Comtrol's IO-Link master gateways provide the most versatile industrial IO-Link master solutions to support the industry's leading protocols, including EtherNet/IP, PROFINET, and MODBUS TCP.

- DeviceMaster® serial to Ethernet gateways enable superior device networking capabilities to connect RS-232/422/485 serial devices like barcode scanners and weight scales.

Pepperl+Fuchs Comtrol

- **RocketLinX® series managed and unmanaged industrial Ethernet switches are designed to meet both performance and environmental demands.**
- **Comprehensive selection of Power-over-Ethernet and Gigabit switches that meet the full range of customer needs.**

Pepperl+Fuchs Control

- Made for applications that require:
 - Extended operating temperatures,
 - Rugged housings,
 - High-performance communication, and
 - Reliable data transfer.

Pepperl+Fuchs Control

Complete Infrastructure for IoT Applications

- **Industry 4.0 solutions:**
 - **Pepperl+Fuchs now offers a comprehensive portfolio of Ethernet-based communication products and field-interface devices, including:**
 - **Industrial Ethernet switches,**
 - **Serial to Ethernet gateways, and**
 - **IO-Link masters with OPC UA standard.**
 - **Seamlessly integrates into your plant while enabling data flow from field devices directly into the cloud.**
