

SmartRunner Technology

- **Light section sensor combined with 2-D vision sensor**
- **Matcher version – specialist for profile comparison**
- **Detector version – specialist for high-precision monitoring**
- **Recording error images for machine diagnostics**

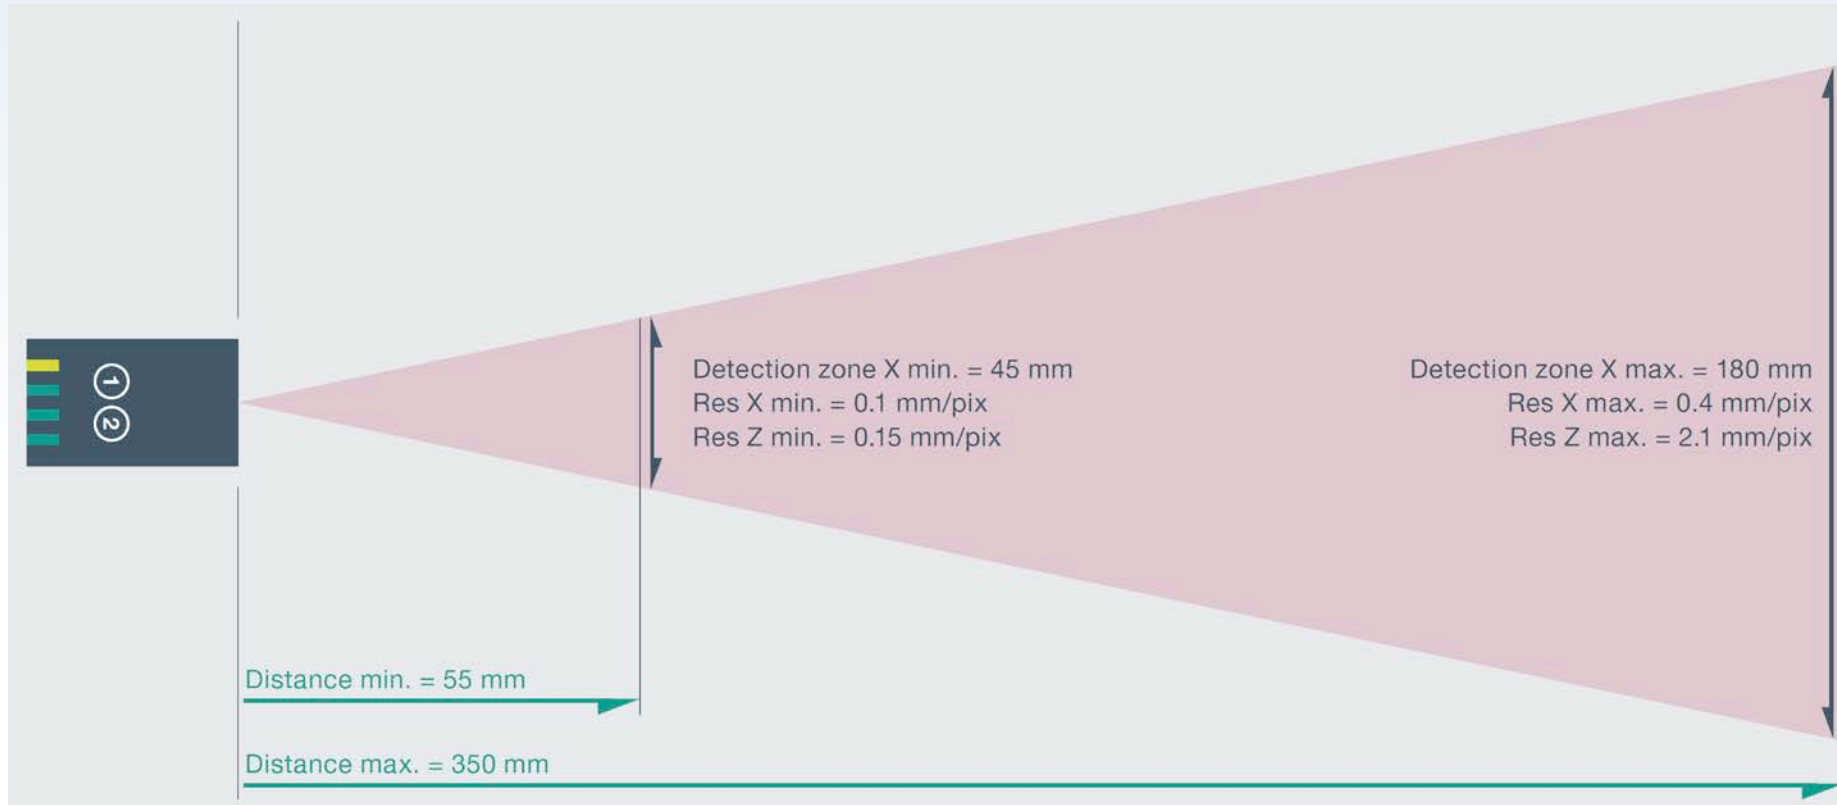

SmartRunner Technology

- **Parametrization via Data Matrix control codes or software for optimal performance**
- **Easy-to-process digital signals**
- **Quick installation due to swiveling connection**

SmartRunner Technology

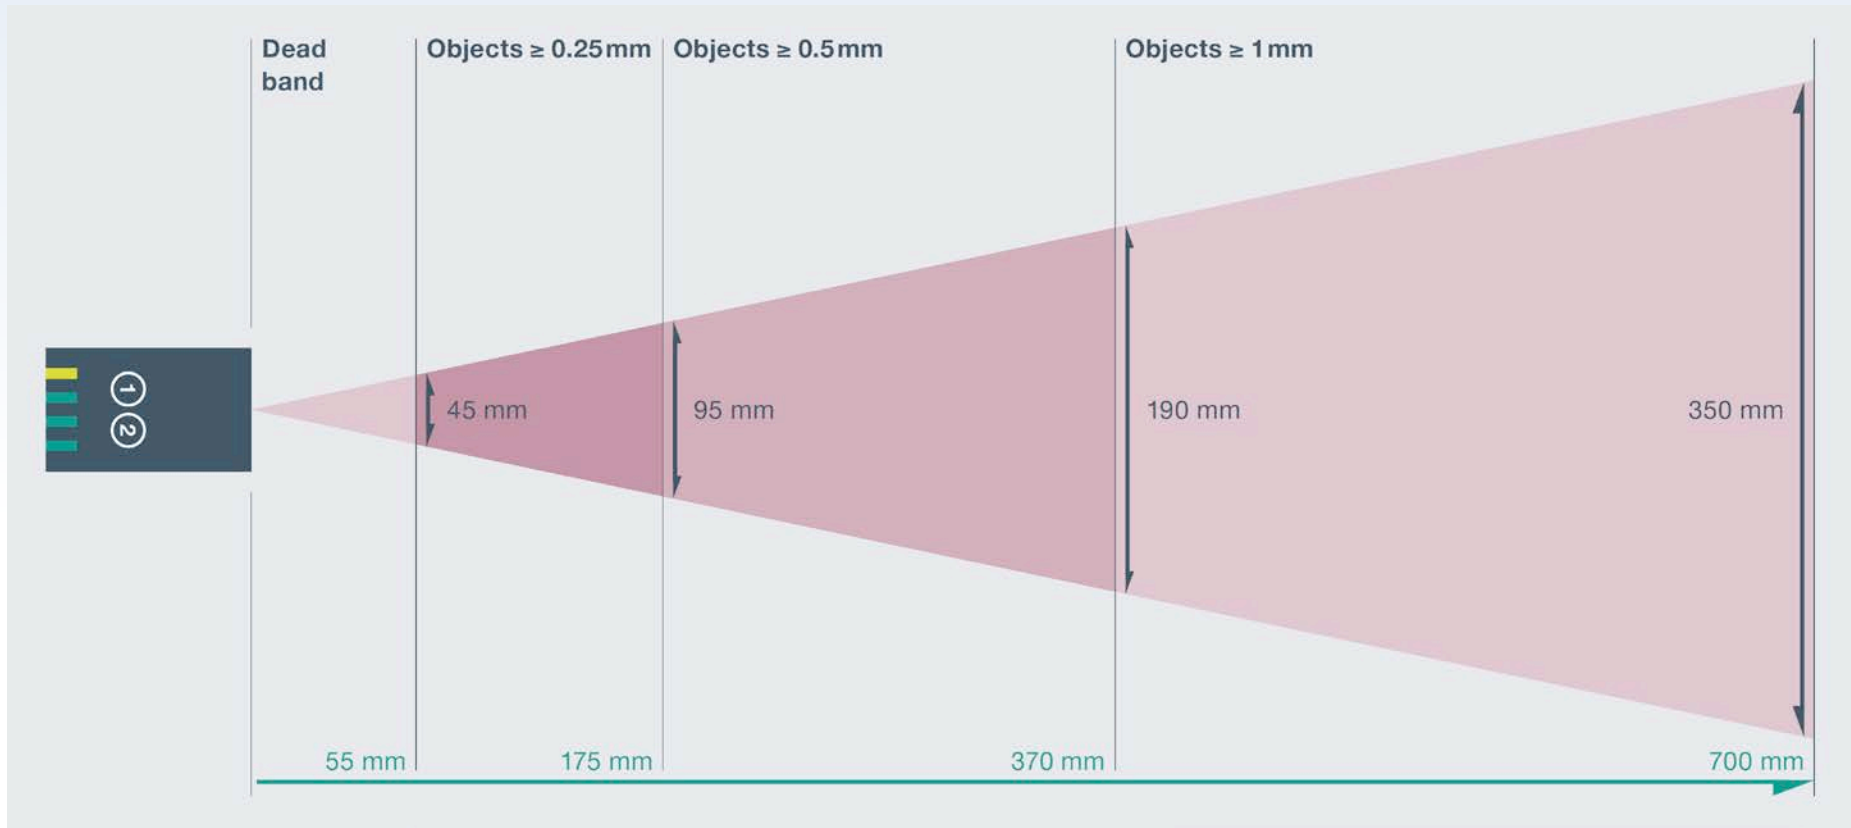

Matcher Detection Area

SmartRunner Technology

Detector Detection Area

SmartRunner Technology

Matcher

- Ensuring accuracy in robotic gripping systems
- Verifying correctness of components

SmartRunner Technology

Detector

- Reliable protection of sensitive machine parts
- Verification of overlapping parts for quality control
