

Sensor Technology 4.0

- **Intelligent sensors, actuators, and field devices**
- **Communication with higher-level networks—EtherNet/IP, PROFINET, EtherCAT**
- **IO-Link is the interface that allows these devices to communicate**

IO-Link Benefits

- **Comprehensive diagnostics and configuration down to the sensor/actuator level**
- **Open communication interface**
- **Simple device replacement and commissioning**
- **Simple and efficient wiring with unshielded standard cables**
- **Automatic transfer of parameters possible when connecting new sensors**
